Projects

StyleFusion - [Link](#)

StyleFusion is an e-commerce website designed in Tailwind CSS. Which delivers seamless responsiveness and modern design, enhancing user experience across all devices.

- Updated backend system to add new products.
- Shopping cart feature for easy product selection.
- Adjustable item quantities with automatic total price calculation, including tax.
- Organized product sections such as 'Men's Wear' and 'Women's Wear' for easy browsing.
- 'Contact Us' form for user inquiries and support.

SnapShare - [Link](#)

SnapShare is a web application similar to a social media where user can share and engage with content on any device with a sleek design.

- User registration and login system using Passport for secure, encrypted authentication.
- User profiles with customizable profile pictures.
- Post upload feature with titles, descriptions, and images.
- Profile section for viewing user-specific posts.
- Feed section to view posts from all users.
- After uploading a post, users can view it in their profile section.
- Detailed post view with user information.
- Option to download and share posts.
